and:

Students pursuing a Bachelor of Arts are required to take Spanish and one Language Intensive (LI) course in their major department. Students pursuing a Bachelor of Science are required to take two Language Intensive courses with at least one LI course in the student's major department.

Language Intensive - Oral and Written Communication

Student Learning Outcome for Oral Communication: Students should be able to clearly voice a coherent message.

Performance Indicators – Students should be able to:

1. Show that they can speak clearly and audibly.
2. Support their ideas with appropriate research.

Speaking Component

(1) Informal oral communication exercises should be used frequently in the LI classroom. Most often, these will consist of required participation in small-group and class discussions. LI instructors can make even routine student participation in class discussions and activities into helpful oral communication exercises simply by (a) raising students' consciousness about the variety of signals they send when they speak informally in class, and (b) helping students eliminate their careless habits in speech and delivery.

(2) At least one formal oral presentation should be included in the LI course. The presentation, probably brief, may be delivered to part or all of the class, or some other audience. It may derive from a formal writing assignment, recast for oral delivery.

Student Learning Outcome for Written Communication: Students should be able to write with skill and clarity.

Performance Indicators – Students should be able to:

1. Produce writing that shows an awareness of audience.
2. Demonstrate effective participation in the writing process.

3. Coherently organize their writing.
4. Produce writing that shows careful attention to craft.

Writing Component

(1) Informal writing assignments should be frequent, perhaps one per class session, but certainly one per week. Most informal writing activities are in the “writing to learn” mode; that is, they are intended to push students to read, think about, and interpret course material more carefully and deeply than they otherwise might do. From a handful of basic, informal writing models, such as journals and microthemes, LI instructors can improvise an almost endless array of specific informal writing activities.

(2) Formal writing assignments should be substantial (but the meaning of “substantial” depends upon the course and the exact nature of the assignment). There should be at least one formal, polished piece of writing. Whenever possible, LI instructors should give formal assignments in stages, confer with students over drafts, and allow ample time for revision(s).
