# **Psychology Program**

# **Purpose Statement**

The psychology program commits itself to developing majors with pre- professional training and non-majors with basic knowledge of and skills in psychology. The program achieves this purpose when its students:

- have acquired knowledge and skills requisite for entry into selected professions, especially pre-professional careers in the behavioral sciences
- have acquired knowledge and skills requisite for entry into graduate programs in psychology and related fields
- have bridged the gap between theory and practice through internships
- can critically analyze human and nonhuman behavior through exposure to psychological theories and research methods
- have enhanced their sensitivity and appreciation of diversity and inclusion issues by studying cultural expectations and approaches to psychological adjustment different from their own

In addition to preparing its majors, psychology contributes to the general education program and serves other majors.

Students who wish to double major in psychology and sociology need have only one emphasis.
